WORK EXPERIENCE

Dignitech Media Works

Noida

Mern Stack Developer

June 2023 – Present

- Designed and developed 2 front-end and back-end applications utilizing React.js, Node.js, and MongoDB
- Collaborate with senior back-end developers to develop new application features and distributed services that support high-scale applications
- Implemented advanced functionality like Mongo aggregation, GridFs, and horizontal scalability using sharding
- Participated in 100+ code reviews to ensure code quality and receive mentoring from senior developers.

Blokminers

Delhi

Mern Stack Developer Intern

Feb 2023 – June 2023

- Designed and built web applications using React.js, Node.js, MongoDB, and TypeScript
- Ensured the performance, quality, and responsiveness of the web application
- Defined, designed, and shipped 10 new features
- Identified and corrected 10+ bottlenecks and 100+ bug fixes
- Helped evolve front-end and back-end stack.

Nature Intake

Delhi

Mern Stack Developer Intern

Mar 2022 – Sep 2022

- Remained up-to-date with industry-standard technologies and mentored a junior developer
- Wrote structured, tested, readable, and maintainable code
- Helped maintain code quality, organization, and automation for an application
- Assisted in developing and implementing systems architecture designs, patterns, and approaches
- Developed web applications and components using React.js, Node.js, and MongoDB.

PERSONAL PROJECTS

BookMyRide (Full Stack Web Application)

It is a web application made with MERN for renting cars where customers may make reservations by paying with Stripe. The admin can control the automobiles and view the reservations. No other customer may book the same car during the time that is already reserved by one.

Weatherly (Front-end Web Application)

Users can search for their selected city or location on a weather app to get the most up-to-date weather report for that location as well as other vital information like important alerts and local temperature changes.

SimplCord (Full Stack Web Application)

SimplCord is a web application created with React, Node, and MongoDB to enable secure user communication in the most straightforward manner. A user can chat with any user who has signed up to simplcord.

Quizzy (Full Stack Web Application)

A quiz app with a stunning user interface created with Nextjs to teach students about nutrition and diet. There are several tests, including a final exam, and after passing them all, a student receives a certificate showing their grade.
